

Jobsite Geogrid

Simplify Trenching Construction with EarthLock Jobsite Geogrid

EarthLock™ Jobsite Geogrid from Tensar® International has proven time and again to be a high quality, low risk solution for trenching repairs.

EarthLock Geogrid acts as a compaction aid for trench fill and aggregate base. EarthLock can easily accommodate trenching, trimming, auguring and other common construction challenges you encounter on the job site.

INSTALLATION

- » Quick and simple, requiring no specialized equipment
- » Easy to cut and handle in the field
- » Simple to navigate around obstacles such as manhole covers or other immovable protrusions
- » Geogrid will cut “clean” and will not unravel into the zone outside the trench cut

Ready to order your roll of EarthLock Jobsite Geogrid for your next project?
