Product Data Sheet - Biaxial Geogrid SQ2020

Product Type: Integrally Formed Biaxial Geogrid

Polymer: Polypropylene

Load Transfer Mechanism: Positive Mechanical Interlock

Primary Applications: Subgrade Improvement and Base Stabilization

This product has been tested for quality control purposes in a GAI-LAP accredited laboratory, it is part of the AASHTO SSGEO Product Evaluation and Audit Solutions program (formerly known as NTPEP), and it is made in the USA.

Product Properties

Index Properties	Units	MD Values	XMD Values
 Aperture Dimensions² 	mm (in)	38 (1.5)	38 (1.5)
Rib Thickness ²	mm (in)	1.1 (0.04)	0.8 (0.03)
 Tensile Strength @2% Strain³ 	kN/m (lb/ft)	6.5 (450)	6.5 (450)
 Tensile Strength @5% Strain³ 	kN/m (lb/ft)	13.0 (890)	13.0 (890)
 Ultimate Tensile Strength³ 	kN/m (lb/ft)	20.0 (1,370)	20.0 (1,370)
Structural Integrity			
 Junction Efficiency⁴ 	%	93	
 Overall Flexural Rigidity⁵ 	mg-cm	700,000	
 Aperture Stability⁶ 	m-N/deg	0.45	
Durability			
 Resistance to Long Term Degradation⁷ 	%	100	
 Resistance to UV Degradation⁸ 	%	98	

Dimensions and Delivery

The biaxial geogrid shall be delivered to the job site in roll form with each roll individually identified and nominally measuring 12.5 feet (3.8 meters) in width and 328 feet (100 meters) in length.

Notes

- 1. Unless indicated otherwise, values shown are minimum average roll values determined in accordance with ASTM D4759-02.
- 2. Nominal dimensions.
- 3. Determined in accordance with ASTM D6637-10 Method A. This product is intended for soil stabilization purposes only. The long-term creep performance of this product has not been characterized, and therefore, it is not suitable for long-term load support applications.
- 4. Load transfer capability determined in accordance with ASTM D7737-11.
- Resistance to bending force determined in accordance with ASTM D7748/D7748M-14.
- 6. Resistance to in-plane rotational movement measured in accordance with ASTM D7864/D7864M-15.
- Resistance to loss of load capacity or structural integrity when subjected to chemically aggressive environments in accordance with EPA 9090 immersion testing.
- 8. Resistance to loss of load capacity or structural integrity when subjected to 500 hours of ultraviolet light and aggressive weathering in accordance with ASTM D4355-05.

Tensar reserves the right to change its Product Data Sheet at any time. It is the responsibility of the person specifying the use of this product and of the purchaser to ensure that Product Data Sheet relied upon for procurement purposes are current and that the product is suitable for its intended use in each instance.
