4.	Display the Tensar Tools palette.....	5
5.	Start TensarDraw™ .....	6
6.	Installation Issues.....	7

1. Download the software

Access the TensorDraw™ homepage using the browser of your choice:

<http://www.tensorcorp.com/TensorDraw>

Select the Download button to begin the download process.

2. Install the software

Navigate to the folder that contains the installation file previously downloaded.

Double-click the installation file and follow the prompts in the dialog windows that follow to install the software.

*It is recommended that you install the software using the default path chosen by TensorDraw™.*

### 3. Add TensorDraw™ tool palette to AutoCAD

Open AutoCAD and start a new drawing. Type “APPLOAD” once the new drawing has been opened (template not important for this step).

Navigate to the TensorDraw™ folder and select the LISP routine “AddPalettePath.lsp”

*This LISP routine adds the TensorDraw™ folder as a support path and also adds the /Tool Palette folder to the Tool Palette File Locations. These operations can be manually performed by typing “Options” in AutoCAD, navigating to each support type and adding the appropriate locations:*

#### 4. Display the Tensor Tools palette

Depending on the number of tool palettes you currently have available, left-click the shaded area in red below and then select the “Tensor Tools” palette:

## 5. Start TensorDraw™

With the Tensor Tools palette open, select the TensorDraw™ logo:

The very first time TensorDraw™ is opened the software will require activation. Select the “Request Pass Code” hyperlink in the dialog that appears and enter the Volume ID displayed in the dialog as the User ID. Select Activate and enter the pass code into the dialog.

*You must be logged into your [tensorcorp.com](https://www.tensorcorp.com) account to activate the software.*

The TensorDraw™ palette should now be displayed and you are ready to use the software!

## 6. Installation Issues

A "Error showing palette" error message may appear initially for Windows 10 users after selecting the TensorDraw™ button on the tool palette. To remedy this, modify the TensorDraw folder properties to allow the current user profile to have Modify, Read, and Write access to the folder:
