A SierraScape wall was designed to repair a landslide and to provide an adequate access road to the community.

PRODUCT

UX1500, UX1600, BX1120 and SierraScape baskets

QUANTITY

6,500 sq mts of UX1500

800 sq mts of UX1600

4,400 sq mts of BX1120

480 Sierra Scape baskets

OWNER AND/OR DEVELOPER

Government of the Republic of Trinidad and Tobago

CONTRACTOR

Ministry of Work & Transportation

UNISURE Limited

ENGINEER

Government of the Republic of Trinidad and Tobago
Programme for Upgrading Roads Efficiency (P.U.R.E.)

INSTALLATION DATE

January 2017

PROJECT DETAILS

For years, the community along Beau Pres Road did not have an adequate access road due to a landslide that occurred after a heavy rain event. Many options were analyzed and all exceed the available repair budget. Then, P.U.R.E. chose the SIERRASCAPE System for their design that provided the neighborhood with safe and wider road for residents and was completed 6 months ahead of schedule. The new road now gives the community better access and cuts the residents' commute time.
